Généralisations

Nos professeurs affiliés et nos équipes travaillent avec les gouvernements, ONG, les organisations charitables et les donateurs pour généraliser les programmes efficaces et pour promouvoir l'utilisation des données scientifiques dans les décisions politiques. A ce jour, 202.72 millions de personnes ont été impactées par ces programmes dans le monde entier.

ENVIRONNEMENT & ÉNERGIE

Information and enforcement to reduce overfishing

Evidence from a randomized evaluation and cost-effectiveness analysis led the Chilean government to expand a consumer information campaign to protect at-risk marine species. *Read More*

MARCHÉ DU TRAVAIL, SANTÉ, ÉDUCATION

Promoting housing choice to improve economic mobility

Evidence from a flagship randomized evaluation in the United States prompted legislative and administrative changes to expand housing choice for low-income families. Read More

MARCHÉ DU TRAVAIL

Unintended effects of anonymous resumes

The French government abandoned a policy that would have required firms to make recruitment decisions based on anonymized resumes after research showed that a voluntary, pilot scheme actually harmed minority applicants' employment chances. Read More

SANTÉ

Limits of technological solutions to provider monitoring

Based on evidence that biometric monitoring technology did not increase doctors' attendance at primary health centers, the government of Karnataka decided to end the program, saving taxpayers millions of dollars. Read More

ÉDUCATION

Individualized tutoring to improve learning

SAGA Innovations's intensive math tutoring program has been shown to improve academic outcomes and has now reached 2,500 disadvantaged students in the United States. Read More

ÉCONOMIE POLITIQUE GOUVERNANCE, FINANCE

Simplified reminders to increase take-up of tax credits

Following an evaluation in California testing variations of reminder letters to low-income households to increase take-up of tax credits, the US tax agency scaled up nationally the use of messaging on notification letters that simply and prominently displayed potential benefits. Read More

ÉDUCATION

A government innovation lab to improve education

With support from J-PAL and IPA, the Ministry of Education in Peru created a dedicated unit to identify, test, and scale low-cost interventions to improve educational outcomes. Read More

FINANCE

Giving directly to support poor households

GiveDirectly has expanded its cash transfer program, which was found in a randomized evaluation to have improved economic and psychological well-being in Kenya, to reach over 60,000 households in rural Kenya, Rwanda, and Uganda since 2013. Read More

ÉCONOMIE POLITIQUE GOUVERNANCE

Fund flow reform for social program delivery

Central and State governments in India have adopted a financial reform to enhance public service delivery informed by evidence. Read More

FINANCE

Targeting the ultra-poor to improve livelihoods

A multifaceted livelihood program has reached and improved the standard of living for more than 640,000 women in Bangladesh and India following randomized evaluations by J-PAL affiliates. Read More

ÉDUCATION

Parental engagement to improve children's schooling

The French Ministry of Education has expanded a parental involvement program to all public schools in the country on a voluntary basis. Read More

ENVIRONNEMENT & ÉNERGIE

Strengthening third-party audits to reduce pollution

Evidence from a randomized evaluation informed the scale-up of a pollution audit policy in Gujarat, India. Read More

ÉCONOMIE POLITIQUE GOUVERNANCE

Targeted information to improve social assistance

Government scale-up improves access to targeted social programs for 65.67 million people. Read More

SANTÉ, ENVIRONNEMENT & ÉNERGIE

Community chlorine dispensers for better health

Innovative safe drinking water technology has reached 4 million people in Kenya, Malawi, and Uganda. Read More

ÉCONOMIE POLITIQUE GOUVERNANCE, SANTÉ

Incentivized community grants for aid effectiveness

Enabling communities to allocate funds to social programs and services that best meet their needs could more effectively reach the neediest individuals and avoid wasteful spending. Read More

ÉCONOMIE POLITIQUE GOUVERNANCE, CRIME, VIOLENCE ET CONFLITS
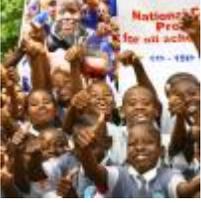

Former la police

Read More

SANTÉ

Distribution gratuite de moustiquaires imprégnées d'insecticide

Les travaux de recherche de Pascaline Dupas, affiliée J-PAL, et de Jessica Cohen ont montré que le fait de faire payer, même faiblement, un produit de santé, tel que des moustiquaires imprégnées d'insecticides, réduit notablement la demande. Read More

ÉDUCATION, SANTÉ

Déparasitage à l'école

Un partenariat entre le State School Health Coordination Committee de l'Etat indien du Bihar (SSHCC) et l'initiative Deworm the World (DtW) s'est traduit par l'un des plus grands programmes de déparasitage scolaire jamais mis en œuvre. Vous pouvez lire ici le communiqué de presse de DtW. Read More

ÉDUCATION

Soutien scolaire
