

Accelerating Changes in Norms about Social Distancing to Combat COVID-19

Researchers:

Dean Yang

Tanya Rosenblat

James Riddell IV

Sector(s): Health

Location: Mozambique

Initiative(s): Innovation in Government Initiative

Target group: General Adults

Intervention type: Covid-19 response

Research Papers: Teaching and Incentives: Substitutes or Complements?

While public health messaging seeks to rapidly change norms to make social distancing more acceptable, norms do not shift instantaneously. Researchers are conducting a randomized evaluations to test the impact of different types of public health messaging on the practice of social distancing.
