1 General Information

- Organized and sponsored by The Abdul Latif Jameel Poverty Action Lab (J-PAL), Latin America & Caribbean regional office.
- Location: Universidad Torcuato Di Tella, Buenos Aires, Argentina.
- Duration: Monday August 24 through Thursday August 27, 2015.
- Schedule: 9.00am–12.00pm & 1.30pm–5.00pm.

Note: For further details please contact Anne Thibault (athibault@povertyactionlab.org), Senior Training Manager, The Abdul Latif Jameel Poverty Action Lab (J-PAL), Latin America & Caribbean regional office.

2 Instructors

- Matias D. Cattaneo, Associate Professor of Economics, University of Michigan.
cattaneo@umich.edu · www.umich.edu/~cattaneo
- Sebastian F. Galiani, Professor of Economics, University of Maryland, and Scientific Director, J-PAL Latin America & Caribbean.
galiani@econ.umd.edu · econweb.umd.edu/~galiani
- Rocío Titiunik, Assistant Professor of Political Science, University of Michigan.
titiunik@umich.edu · www.umich.edu/~titiunik

Note: Research and related work underlying this short course was generously supported by the National Science Foundation (USA) through grant SES-1357561.

3 Overview and Required Background

This short course provides an introduction to classical and recent methodological developments in the analysis and interpretation of experimental and quasi-experimental research designs in the Social Sciences. The course will focus on three main topics: (i) introduction to causal inference, (ii) analysis of randomized experiments, and (iii) regression discontinuity (RD) designs. A brief outline of the course, along with some background references, is given below.

Participants are expected to have elementary working knowledge of statistics, econometrics and program evaluation. It would be useful, but not required, if participants were familiar with basic results from the literature on program evaluation and treatment effects, at the level of Angrist and Pischke (2009). See also Wooldridge (2010) for a graduate level textbook review on econometrics and program evaluation. However, the course is designed to be self-contained and hence most underlying statistical and econometric concepts will be explained in class. For more comprehensive technical reviews on causal inference and policy evaluation see Heckman and Vytlacil (2007) and Imbens and Wooldridge (2009).
4 Schedule & Background References

The first three days will focus on causal inference and analysis of experiments. Main background references for the topics covered include Angrist and Pischke (2009), Gerber and Green (2012), Glennerster and Takavarashan (2013), Morgan and Winship (2015), and Imbens and Rubin (2015).

The last day will focus on a quasi-experimental research design. This year the course will discuss Regression Discontinuity (RD) designs. For general reviews see Imbens and Lemieux (2008), Lee and Lemieux (2010), Skovron and Titiunik (2015), and Cattaneo and Titiunik (2015). The course will focus on some recent developments, following the results in Calonico, Cattaneo, and Titiunik (2014a,b, 2015a,b), Cattaneo, Frandsen, and Titiunik (2015), Keele and Titiunik (2015), Cattaneo, Keele, Titiunik, and Vazquez Bare (2015), Cattaneo, Jansson, and Ma (2015a,b).

Day 1 (Mon 24-Aug 2015): Introduction

09.00am – 10.15am: Review of Statistical Inference.
10.45am – 12.00pm: Causal Inference and Experimental Designs.
01.30pm – 02.45pm: Simple versus Cluster Randomization.
03.15pm – 04.30pm: Power Analysis.
04.30pm – 05.00pm: Q&A and general discussion

Day 2 (Tue 25-Aug 2015): Analysis of Experiments

09.00am – 10.15am: Finite-sample inference methods.
10.45am – 12.00pm: Large-sample and non-parametric inference methods.
01.30pm – 02.45pm: Randomization inference methods.
03.15pm – 04.30pm: Empirical Applications in Economics and Political Science.
04.30pm – 05.00pm: Q&A and general discussion

Day 3 (Tue 26-Aug 2015): Departures from Canonical RCTs

09.00am – 10.15am: Non-compliance.
10.45am – 12.00pm: Attrition and Bound Analysis.
01.30pm – 02.45pm: Multiple Testing.
03.10pm – 04.30pm: Empirical Applications in Economics and Political Science.
04.30pm – 05.00pm: Q&A and general discussion

09.00am – 10.20am: Introduction to RD designs.
10.45am – 12.00pm: RD designs as “local randomized experiments”.
01.30pm – 02.45pm: Local-polynomial methods.
03.15pm – 04.30pm: Empirical Applications in Economics and Political Science.
04.30pm – 05.00pm: Q&A and general discussion
